The main reason I got the soundtrack was in the hopes I could find the tune the birds were chirping in the opening scene, but no such luck. It is pretty nice though, you can give it a listen on Bandcamp if you're not sure yet.

The artbook is good, it's a bunch of amusing doodles of Chuchel (a few of them being his animation design and interactive scenes). For the current sale price of \$32.74 it might still be too much, but I did buy it in Steam's Amanita bundle deal so that might be the way to go if you do wanna get this.
