
The FIFA 13 game for Mac OS X is released today. The game brings to your desktop an exciting football simulator! You can take part in this brilliant game with all the worldwide football superstars, who are on board with their national teams to compete in the biggest football tournament of all time - 2013 FIFA Confederations Cup. If you are a football fan, this is your opportunity to get up close and personal with the world of professional soccer. The previous version, FIFA 12 was released for Windows PC, PS3 and Xbox 360 platforms only. This new release has widened its market range by being playable on Apple's popular hardware for home computers - MacBook Pro, iMac and MacBook Air models running on Mac OS X 10.8 Mountain Lion. Again, if you are an EA Small Sports lover, you may also like to be updated with the EA SPORTS FIFA Soccer 13 for Mac OS X game. Here are the system requirements for FIFA 13 : OS: Mac OS X 10.8 or later Processor:2.4 GHz Intel Core 2 Duo (Dual-Core) processor or better, i3, i5, or i7 processor Memory: 4 GB RAM Graphics: ATI Radeon HD 4670 / NVIDIA 8800 GT / Intel HD 3000 Integrated Graphics Processor or better 256 MB video memory required Hard Drive Space: 7 GB available space This game is not officially licensed by FIFA and UEFA. The game name and the FIFA World Cup marks are trademarks of FIFA. All rights reserved. Manufactured under license by Electronic Arts Inc. The Mac App Store provides a free trial version of the game for a limited time. Since the Mac App Store exists only on the Mac, not on other Apple hardware this version of FIFA 13 can be downloaded from your Mac only. Mac Mini, iMac, MacBook Pro and MacBook Air users who wish to use their computer as a gaming system can purchase an external SuperDrive for this purpose, or use any of such USB ports as those that are found on most modern USB hubs.

FIFA 13 is also available on Android devices via Amazon Appstore. The game offers an authentic FIFA gaming experience on Android devices.

FIFA 13 for Windows PC, PS3 and Xbox 360 platforms has received positive reviews after its launch at the end of the 2012 soccer season. The game is considered to be a sequel to 2011's FIFA 12 which had been designed with fan feedback. The new features include five new modes, more than 700 new gameplay animations, upgraded AI and goal-line technology. The updated feature of "First Touch Control" allows gamers to utilize and control the ball and keep it away from attackers by dribbling with their players more easily than before.
